Journal of
APPLIED PHYSIOLOGY

VOLUME 40 *January–June 1976*

EDITORIAL BOARD

SECTION EDITORS

Circulation – P. C. JOHNSON; M. N. LEVY; W. W. PARMLEY
Respiration – F. G. HOPPIN, JR.; T. C. LLOYD, JR
Renal & Electrolyte Physiology – J. J. GRANTHAM; W. E. LASSITER
Gastrointestinal Physiology – J. G. FORTE
Endocrinology & Metabolism – D. S. GANN; N. S. HALMI
Environmental Physiology & Exercise – E. R. BUSKIRK; A. P. GAGGE
Comparative & General Physiology – L. B. KIRSCHNER
Neurobiology – O. A. SMITH
Hematology – H. M. RANNEY
Muscle Physiology – FRANKLIN FUCHS
Biomedical Engineering – T. G. COLEMAN

Contents of Volume 40

Key to Sections:

1. Circulation
2. Respiration
3. Renal & Electrolyte Physiology
4. Gastrointestinal Physiology
5. Endocrinology & Metabolism
6. Environmental Physiology & Exercise
7. Comparative Physiology
8. General Physiology
9. Neurobiology
10. Hematology
11. Muscle Physiology
12. Biomedical Engineering

No. 1. JANUARY 1976

SECTION			PAGE
1, 2, 11	Hydrogen ion concentration and oxygen uptake in isolated canine hindlimb.	*A. H. Harken*	1
6, 11	Muscle water and electrolytes following varied levels of dehydration in man.	*D. L. Costill, R. Coté, and W Fink*	6
6, 11	Force-velocity relations and fiber composition in human knee extensor muscles.	*A. Thorstensson, G. Grimby, and J. Karlsson*	12
1	Transcapillary exchange of strontium and sucrose in canine tibia.	*D. R. Davies, J. B. Bassingthwaighte, and P. J. Kelly*	17
2	Central neural stimulation of respiration in unanesthetized decerebrate cats.	*F. L. Eldridge*	23
5, 6, 7	Fever: exchange of shivering by nonshivering pyrogenesis in cold-acclimated guinea pigs.	*C. M. Blatteis*	29
5, 6, 7	Effect of propranolol on endotoxin-induced pyrogenesis in newborn and adult guinea pigs.	*C. M. Blatteis*	35
4	Cholinergic effect on peristalsis.	*J. B. Hollis and D. O. Castell*	40
9, 11	Frequency and displacement amplitude relations for normal hand tremor.	*R. N. Stiles*	44
6	Body fluid responses of heat-tolerant and intolerant men to work in a hot wet environment.	*L. C. Senay and R. Kok*	55
1, 10	Augmentation of the sickling process due to turbulent blood flow.	*P. D. Stein, H. N. Sabbah, and A. K. Mandal*	60
2, 11	Effect of hyperinflation on inspiratory function of the diaphragm.	*V. D. Minh, G. F. Dolan, R. F. Konopka, and K. M. Moser*	67
1	A quantitative description of the normal AV nodal conduction curve in man.	*S. Teague, S. Collins, D. Wu, P. Denes, K. Rosen, and R. Arzbaecher*	74
9	Interactions of human cord dorsum potential.	*K. Shimoti, M. Matsuki, Y. Ito, K. Masuko, M. Maruyama, T. Iwane, and S. Aida*	79
1, 6	Metabolic and cardiovascular adjustment to work in air and water at 18, 25, and 33°C.	*W. D. McArdle, J. R. Magel, G. R. Lesnes, and G. S. Pechar*	85
6	Measurement of cardiac output by electrical impedance at rest and during exercise.	*J. C. Denniston, J. T. Maher, J. T. Reeves, J. C. Cruz, A. Cymerman, and R. F. Grover*	91
6	Sustained venoconstriction in man supplemented with CO_2 at high altitude.	*J. C. Cruz, R. F. Grover, J. T. Reeves, J. T. Maher, A. Cymerman, and J. C. Denniston*	96

SPECIAL COMMUNICATIONS

2, 5	Determination of body surface area in the rhesus monkey.	*C. T. Liu and G. A. Higbee*	101
1	Semiautomated processing of systolic time intervals.	*M. A. B. Frey and R. A. Kenney*	105
2	Nonrebreathing valve system for small animal respiratory measurements.	*R. E. Barrow*	108
2	Validation of an automated determination of pulmonary resistance by electrical subtraction.	*J. M. Drazen, S. H. Loring, and R. Regan*	110
11	In vivo motility of the unobstructed fallopian tube.	*S. K. Guha, S. Anand, and G. P. Talwar*	114
2	Biplane videoroentgenographic analysis of dynamic regional lung strains in dogs.	*P. A. Chevalier, J. F. Greenleaf, R. A. Robb, and E. H. Wood*	118
2	Cerebrospinal fluid sampling technique and Astrup pH and P_{CO_2} values.	*D. G. Davies*	123

No. 2. FEBRUARY 1976

6	Effects of temperature and wind on facial temperature, heart rate, and sensation.	*J. LeBlanc, B. Blais, B. Barabe, and J. Coté*	127
1	Sudden interruption of leaflet opening by ventricular contractions: a mechanism of mitral regurgitation.	*A. G. Tsakiris, D. A. Gordon, Y. Mathieu, R. Padiyar, and C. Labrosse*	132
2, 6, 9	Synchronization of respiratory frequency by somatic afferent stimulation.	*S. Iscoe and C. Polosa*	138
6, 11	Skeletal muscle enzymes and fiber composition in male and female track athletes.	*D. L. Costill, J. Daniels, W. Evans, W. Fink, G. Krahenbuhl, and B. Saltin*	149

SECTION		PAGE
6	Effects of exercise on excretion rates of urinary free cortisol. *A. Bonen*	155
6	Time-motion and physiological assessments of ice hockey performance. *H. Green, P. Bishop, M. Houston, R. McKillop, R. Norman, and P. Stothart*	159
3	Mechanical properties of dog renal capsule. *L. A. Hebert, W.-C. Chen, A. Hartmann, and J. C. Garancis*	164
1	Arterial pressure contour analysis for estimating human vascular properties. *T. B. Watt, Jr., and C. S. Burrus*	171
2	Respiratory volume-time relationships during resistive loading in the cat. *F. W. Zechman, D. T. Frazier, and D. A. Lally*	177
2, 7	Hypoventilation in ponies after carotid body denervation. *G. E. Bisgard, H. V. Forster, J. A. Orr, D. D. Bass, C. A. Rawlings, and B. Rasmussen*	184
1, 6	Total and regional cerebral blood flow during moderate and severe exercise in miniature swine. *D. L. Foreman, M. Sanders, and C. M. Bloor*	191
1	Comparative evaluation of pressure and time factors in estimating left ventricular performance. *F. L. Abel*	196
1, 2, 6	Effects of hypoxia, heat, and humidity on physical performance. *S. Lahiri, C. A. Weitz, J. S. Milledge, and M. C. Fishman*	206
1, 2, 6	Growth and physical training with reference to heredity. *G. Weber, W. Kartodihardjo, and V. Klissouras*	211
2	Local regulation of pulmonary blood flow and ventilation-perfusion ratios in the coatimundi. *B. J. B. Grant, E. E. Davies, H. A. Jones, and J. M. B. Hughes*	216
1, 2, 6	Decompression limits for compressed air determined by ultrasonically detected blood bubbles. *M. P. Spencer*	229
7	Physiological adjustments of young men to five-hour desert walks. *D. B. Dill, L. F. Soholt, and J. Oddershede*	236

SPECIAL COMMUNICATIONS

11	An ultrasensitive isometric force transducer for single smooth muscle cell mechanics. *P. G. Canaday and F. S. Fay*	243
2	Collection of normal canine tracheobronchial secretions. *G. K. Adams, E. F. Aharonson, M. J. Reasor, and D. F. Proctor*	247
1	Can impedance characterize the heart? *W. Hunter and A. Noordergraaf*	250
1	An inexpensive blood pressure-heart rate computer for laboratory or teaching use. *P. Martin*	253
1	Probe for production and measurement of acute mitral regurgitant flow in dog. *A. G. Kléber, R. Simon, and W. Rutishauser*	256
3, 8	Construction of picoliter-nanoliter self-filling volumetric pipettes. *P. M. Quinton*	260
1	Nonobstructive chronic cannulation of the left circumflex coronary artery of the dog. *J. S. Rankin, P. A. McHale, and J. C. Greenfield, Jr.*	263
1	On-line cardiac output by digital computer. *F. Huber, I. E. Sodal, and J. W. Weil*	266
1, 4, 5	Method for measuring hepatic uptake of oxygen or other blood-borne substances in situ. *W. W. Lautt*	269
2	Application of the hot-wire anemometer to respiratory measurements in small animals. *A. Godal, D. A. Belenky, T. A. Standaert, D. E. Woodrum, L. Grimsrud, and W. A. Hodson*	275
8, 9	A simple electrolytic method for cutting small-diameter stainless steel tubing. *V. A. Lewis and G. F. Gebhart*	278

No. 3. MARCH 1976

2	Effect of ether on control of rate and depth of breathing in newborn rabbits. *B. T. Thach, I. Wyszogrodski, and J. Milic-Emili*	281
10	Fibrinolytic and hemostatic changes during and after maximal exercise in males. *G. L. Davis, C. F. Abildgaard, E. M. Bernauer, and M. Britton*	287
1, 2, 3	Effects of water immersion to the neck on pulmonary circulation and tissue volume in man. *R. Begin, M. Epstein, M. A. Sackner, R. Levinson, R. Dougherty, and D. Duncan*	293
6	Prediction of body density in young and middle-aged men. *M. L. Pollock, T. Hickman, A. Kendrick, A. Jackson, A. Linnerud, and G. Dawson*	300
2	Single-breath oxygen tests for individual lungs in awake man. *A. R. Frazier, K. Rehder, A. D. Sessler, J. R. Rodarte, and R. E. Hyatt*	305
6, 11	Lactate metabolism in resting and exercising dogs. *B. Issekutz, Jr., W. A. S. Shaw, and A. C. Issekutz*	312
2, 6	Human lung mechanics during water immersion. *C. Prefaut, E. Lupi-H., and N. R. Anthonisen*	320
1, 6, 11	Chronic carbon monoxide poisoning: effects on performance of the isolated right ventricle. *L. B. Bugaisky and D. G. Penney*	324
2	Transit time analysis of the forced expiratory spirogram in growth. *N. Neuberger, H. Levison, A. C. Bryan, and K. Kruger*	329
1, 2	Effects of hypocapnia and hypocapnic alkalosis on cardiovascular function. *C. W. Zwillich, D. J. Pierson, E. M. Creagh, and J. V. Weil*	333
2	Effects of hypercapnia on mouth pressure during airway occlusion in conscious man. *M. D. Altose, S. G. Kelsen, N. N. Stanley, R. S. Levinson, N. S. Cherniack, and A. P. Fishman*	338
2	Effects of hypercapnia and flow-resistive loading on tracheal pressure during airway occlusion. *M. D. Altose, S. G. Kelsen, N. N. Stanley, N. S. Cherniack, and A. P. Fishman*	345
2	An intercostal-phrenic inhibitory reflex in human newborn infants. *R. Knill and A. C. Bryan*	352

SECTION			PAGE
2	Respiratory load compensation in infants.	*R. Knill, W. Andrews, A. C. Bryan, and M. H. Bryan*	357
2	Convective and diffusive gas mixing in human lungs: experiments and model analysis.	*R. S. Sikand, H. Magnussen, P. Scheid, and J. Piiper*	362
2	Effect of hypoxia on the pressure developed by inspiratory muscles during airway occlusion.	*S. G. Kelsen, M. D. Altose, N. N. Stanley, R. S. Levinson, N. S. Cherniack, and A. P. Fishman*	372
1, 6, 10	Central circulation during exercise after venesection and reinfusion.	*B. Ekblom, G. Wilson, and P.-O. Astrand*	379
6	Heat storage regulation in exercise during thermal transients.	*P. Chappuis, P. Pittet, and E. Jéquier*	384
2, 7	Oxygen dissociation curve for chorioallantoic capillary blood of chicken embryo.	*H. Tazawa, T. Ono, and M. Mochizuki*	393
2, 7, 10	Oxygenation and deoxygenation velocity factors of chorioallantoic capillary blood.	*H. Tazawa, T. Ono, and M. Mochizuki*	399
6	Adaptive modifications in the thermoregulatory system of long-distance runners.	*E. Baum, K. Brück, and H. P. Schwennicke*	404
2	Influence of bronchomotor tone on regional ventilation distribution at residual volume.	*L. A. Engel, L. Laudau, L. Taussig, R. R. Martin, and G. Sybrecht*	411
1, 2, 8	Influence of diaphragmatic contraction on ventilation distribution in horizontal man.	*C. S. Roussos, Y. Fukuchi, P. T. Macklem, and L. A. Engel*	417
1	A square-pulse flow method for measuring characteristics of the arterial bed.	*M. G. Bottomley and G. W. Mainwood*	425
1	Reflex and mechanical circulatory effects of graded Valsalva maneuvers in normal man.	*P. I. Korner, A. M. Tonkin, and J. B. Uther*	434

SPECIAL COMMUNICATIONS

2, 10	Oxygen electrode syringe as an instrument for determining oxygen-hemoglobin dissociation curves.	*V. A. Knight*	441
2	A clinical catheter for continuous blood gas measurement by mass spectrometry.	*J. W. Brantigan and D. Albo*	443
8	An intact globe technique for electrophysiological studies on cornea.	*C. N. Graves, S. S. Sanders, R. L. Shoemaker, and W. S. Rehm*	447
1	Transthoracic admittance plethysmograph for measuring cardiac output.	*H. Ito, K. Yamakoshi, and T. Togawa*	451
6, 8	Changes in cold-induced vasodilation during Arctic exercises.	*S. D. Livingstone*	455
1	A method to obtain infusion schedules for prescribed blood concentration time courses.	*C. S. Patlak and K. D. Pettigrew*	458
2	A sensitive five-breath N_2 washout test of distribution of ventilation.	*G. R. Weygandt*	464
2	Aerosol penetrance: a sensitive index of peripheral airways obstruction.	*M. B. Dolovich, J. Sanchis, C. Rossman, and M. T. Newhouse*	468
1	Reference sample method for cardiac output and regional blood flow determinations in the rat.	*A. B. Malik, J. E. Kaplan, and T. M. Saba*	472
1, 2, 3	Reusable tubular membrane oxygenator for isolated organ hemoperfusion.	*W. H. Waugh, T. E. Bales, and H. Nihei*	476
3, 8	Hyperbaric system for oxygen toxicity studies in the toad urinary bladder.	*J. H. Miller, D. Hall, D. Haworth, and S. A. Mendoza*	483
2, 6	O_2 affinity of human blood in presence of carbon monoxide.	*C. R. Collier*	487

No. 4. APRIL 1976

1, 2, 6	Gas exchange in man during combined $+G_z$ acceleration and exercise.	*S. A. Nunneley*	491
2, 6	Failure of histamine antagonists to prevent hypoxic pulmonary vasoconstriction in dogs.	*A. Tucker, E. K. Weir, J. T. Reeves, and R. F. Grover*	496
1, 8, 9	Total and regional cerebral blood flow measurement with 7-10-, 15-, 25-, and 50-μm microspheres.	*M. L. Marcus, D. D. Heistad, J. C. Ehrhardt, and F. M. Abboud*	501
2	Elastic constants of inflated lobes of dogs lungs.	*S. J. Lai-Fook, T. A. Wilson, R. E. Hyatt, and J. R. Rodarte*	508
6, 9	Two-dimensional determination of thermosensitive sites within the goat's hypothalamus.	*C. Jessen*	514
6	Contribution of gular flutter to evaporative cooling in Japanese quail.	*W. W. Weathers and D. C. Schoenbaechler*	521
2	Effect of aerosolized isoproterenol on resting myogenic tone in normals.	*A. M. Stamm, J. L. Clausen, and G. M. Tisi*	525
1, 2, 11	Effect of substrate on hypoxic response of pulmonary artery.	*J. F. Souhrada and D. W. Dickey*	533
2	Maturational changes of effective elastance on the first 10 days of life.	*S. M. Adler, B. T. Thach, and I. D. Frantz III*	539
6, 8	Canine hyperthermia with cerebral protection.	*R. W. Carithers and R. C. Seagrave*	543

SECTION		PAGE
1, 2, 6	Circulatory effects of prolonged hypoxia before and during antihistamine. *J. E. Levasseur, H. A. Kontos, D. W. Richardson, and J. L. Patterson, Jr.*	549
2, 9	Dual contribution theory of regulation of CSF HCO_3^- in respiratory acidosis. *F. M. Hasan and H. Kazemi*	559
2	Effects of continuous positive-pressure ventilation in experimental pulmonary edema. *P. C. Hopewell and J. F. Murray*	568
1	Light-absorbing properties, stability, and spectral stabilization of indocyanine green. *M. L. J. Landsman, G. Kwant, G. A. Mook, and W. G. Zijlstra*	575
6	Energy cost of speed skating and efficiency of work against air resistance. *P. E. di Prampero, G. Cortili, P. Mognoni, and F. Saibene*	584

Contents of Volume 41

Key to Sections:

1. Circulation
2. Respiration
3. Renal & Electrolyte Physiology
4. Gastrointestinal Physiology
5. Endocrinology & Metabolism
6. Environmental Physiology & Exercise
7. Comparative Physiology
8. General Physiology
9. Neurobiology
10. Hematology
11. Muscle Physiology
12. Biomedical Engineering

No. 1. JULY 1976

SECTION		PAGE
2	Visceral and somatic reflexes, produced by J pulmonary receptors in newborn kittens. *M. Kalia*	1
2	Reduced surface tension in lungs of fetal rabbits injected with pilocarpine. *A. J. S. Corbet, P. Flax, and A. J. Rudolph*	7
6	Nocturnal lowering of thresholds for sweating and vasodilation. *C. B. Wenger, M. F. Roberts, J. A. J. Stolwijk, and E. R. Nadel*	15
2	Sex and age differences in pulmonary mechanics in normal nonsmoking subjects. *G. J. Gibson, N. B. Pride, C. O'Cain, and R. Quagliato*	20
1, 5, 6	Plasma renin, angiotensin II, and plasma and urinary aldosterone in running exercise. *K. J. Kosunen and A. J. Pakarinen*	26
1	Autonomic innervation of dog coronary arteries. *M. J. Denn and H. L. Stone*	30
1	Baroreflex sensitivity and carotid sinus dimensions in dogs with coarctation. *L. I. Bonchek, A. Doctor, and P. M. Rees*	36
2	Maturational effects on respiratory responses to carbon dioxide in premature infants. *I. D. Frantz III, S. M. Adler, B. T. Thach, and H. W. Taeusch, Jr.*	41
6	Physiological aging of champion runners. *S. Robinson, D. B. Dill, R. D. Robinson, S. P. Tzankoff, and J. A. Wagner*	46
1, 6	Systolic time intervals during $+G_z$ acceleration. *T. B. Graboys and E. D. Michaelson*	52
6	Thermoregulatory response of women to intermittent work in the heat. *B. L. Drinkwater, J. E. Denton, P. B. Raven, and S. M. Horvath*	57
2, 7, 11	Comparison of drug-induced responses of rabbit trachea and bronchus. *J. H. Fleisch and P. J. Calkins*	62
6	Shivering threshold in hypercapnia. *K. E. Schaefer and W. W. Wuennenberg*	67
6	Physiologic limits to work in the heat and evaporative coefficient for women. *E. Kamon and B. Avellini*	71
5, 8, 9	Effects of body weight and food intake on pleasantness ratings for a sweet stimulus. *D. A. Thompson, H. R. Moskowitz, and R. G. Campbell*	77
1, 2	Effect of angiotensin on hypoxic pulmonary vasoconstriction in isolated dog lung. *J. M. Alexander, M. D. Nyby, and K. A. Jasberg*	84
2, 6	Effects of limping on normal exercise response. *R. L. Hughes, D. Frownfelter, and M. Piergies*	89
2	Alkaline shift in lumbar and intracranial CSF in man after 5 days at high altitude. *R. B. Weiskopf, R. A. Gabel, and V. Fencl*	93

SPECIAL COMMUNICATIONS

9	A digital display of neuronal average firing frequencies. *N. H. Sabah*	98
2, 12	A new method to determine frequency characteristics of the respiratory system. *F. J. Landser, J. Nagels, M. Demedts, L. Billiet, and K. P. van de Woestijne*	101
1, 12	An improved plethysmograph with servo control of hydrostatic pressure. *J. Zink, J. Delaive, E. W. Mazerall, and C. V. Greenway*	107
1, 9	Implantable electrode for recording nerve signals in awake animals. *I. Ninomiya, Y. Yonezawa, and M. F. Wilson*	111
2	Gas transport in a model derived from Hansen-Ampaya anatomical data of the human lung. *M. Paiva, L. M. Lacquet, and L. P. van der Linden*	115
2, 6, 12	Pneumotachograph for flow and volume measurement in normal and dense atmospheres. *R. Gelfand, C. J. Lambertsen, R. E. Peterson, and A. Slater*	120
2, 8, 12	A pressure- and flow-insensitive reference electrode liquid junction. *E. D. Crandall and J. DeLong*	125

No. 2. AUGUST 1976

2	Age and sex differences in lung elasticity and in closing capacity in nonsmokers. *F. R. Bode, J. Dosman, R. R. Martin, H. Ghezzo, and P. T. Macklem*	129
2, 6	Energetics of isometric exercise in man. *P. Cerretelli, A. Veicsteinas, M. Fumagalli, and L. Dell'Orto*	136

SECTION		PAGE
6	Cold-induced shivering in men with thermoneutral skin temperatures. *A. G. C. Buguet, S. D. Livingstone, L. D. Reed, and R. E. Limmer*	142
2, 6	Effect of adrenergic agents and their mode of action on mucociliary clearance in man. *W. M. Foster, E. H. Bergofsky, D. E. Bohning, M. Lippmann, and R. E. Albert*	146
2	Effect of volume history on successive partial expiratory flow-volume maneuvers. *J. J. Wellman, R. Brown, R. H. Ingram, Jr., J. Mead, and E. R. McFadden, Jr.*	153
1, 2, 6	Respiratory, circulatory, and ECG changes during acute exposure to high altitude. *P. Laciga and E. A. Koller*	159
2, 6, 10	Respiratory adaptations in burrowing pocket gophers from sea level and high altitude. *A. J. Lechner*	168
2, 7, 10	Papain inhibition by serum. *M. J. Fisher, R. E. Jay, L. D. Haugh, and E. G. Sander*	174
1, 2, 8	Po_2 in the carotid body perfused and/or superfused with cell-free media. *W. J. Whalen and P. Nair*	180
2	Xenon and nitrogen single-breath washout curves in patients with airway obstruction. *M. Demedts, M. De Roo, J. Cosemans, L. Billiet, and K. P. van de Woestijne*	185
2, 6	Maximal oxygen uptake during exercise with various combinations of arm and leg work. *U. Bergh, I.-L. Kanstrup, and B. Ekblom*	191
1, 6	Uteroplacental blood flow during hyperthermia with and without respiratory alkalosis. *G. K. Oakes, A. M. Walker, R. A. Ehrenkranz, R. C. Cefalo, and R. A. Chez*	197
6	Effect of ascorbic acid on rate of heat acclimatization. *N. B. Strydom, H. F. Kotze, W. H. van der Walt, and G. G. Rogers*	202
2, 6	Effect of increased gas density on pulmonary gas exchange in man. *L. D. H. Wood, A. C. Bryan, S. K. Bau, T. R. Weng, and H. Levison*	206
1, 2, 8	Platelet antiserum inhibits hypoxic pulmonary vasoconstriction in the dog. *E. K. Weir, J. Mlczoch, J. Seavy, J. J. Cohen, and R. F. Grover*	211
2, 3	Control of breathing in uremia: ventilatory response to CO_2 after hemodialysis. *R. W. Hamilton, P. E. Epstein, L. W. Henderson, N. H. Edelman, and A. P. Fishman*	216
6	Influence of muscular development, obesity, and age on the fat-free mass of adults. *J. Womersley, J. V. G. A. Durnin, K. Boddy, and M. Mahaffy*	223
3, 6	Effects of water immersion on renal hemodynamics in normal man. *M. Epstein, R. Levinson, and R. Loutzenhiser*	230
2	Effect of gas physical properties and flow on lower pulmonary resistance. *L. D. H. Wood, L. A. Engel, P. Griffin, P. Despas, and P. T. Macklem*	234

SPECIAL COMMUNICATIONS

1, 2	Tissue oxygen tension in rabbits measured with a galvanic electrode. *M. E. Towell, I. Lysak, E. C. Layne, and S. P. Bessman*	245
1, 6	Correction for cardiac output calculations by the nitrous oxide technique. *J. A. Wagner, J. F. Bedi, and S. M. Horvath*	251
2, 12	Servo respirator constructed from a positive-pressure ventilator. *J. E. Remmers and H. Gautier*	252
6, 12	New method for measuring skin humidity. *H. Reinhardt and G. Brenneisen*	256
2, 8, 12	A development of the oxyhemoglobin dissociation curve analyzer. *C. E. W. Hahn, P. Foëx, and C. M. Raynor*	259
1, 9, 12	Method for chronic recording of electroencephalographic activity in conscious dogs. *C. M. Ferrario, D. B. Averill, G. R. Nadzam, D. S. Porritt, and J. W. McCubbin*	268
2	Esophageal elastance in awake and anesthetized recumbent dogs. *Y.-L. Lai, J. R. Rodarte, and R. E. Hyatt*	272

No. 3. SEPTEMBER 1976

2	Effect of mechanical factors on the relation between rate and depth of breathing in cats. *G. Miserocchi and J. Milic-Emili*	277
2	Adaptation of anesthetized men to breathing through an inspiratory resistor. *W. A. Whitelaw, J.-P. Derenne, J. Couture, and J. Milic-Emili*	285
1, 5, 6	Physiological and behavioral reactions to repeated tail cooling in the white rat. *R. Eide*	292
1, 2, 7	Effects of intermittent hyperbaric oxygen on guinea pig lung elastin and collagen. *V. Richmond and B. D'Aoust*	295
2, 7	Gas-blood CO_2 equilibration in parabronchial lungs of birds. *M. Meyer, H. Worth, and P. Scheid*	302
2	Vagal afferents essential for abdominal muscle activity during lung inflation in cats. *J. A. Russell and B. Bishop*	310
11, 12	Uterine work in parturition. *T. J. Kriewall*	316
1, 5, 6	Plasma renin activity, angiotensin II, and aldosterone during intense heat stress. *K. J. Kosunen, A. J. Pakarinen, K. Kuoppasalmi, and H. Adlecreutz*	323
6	Evaluation of the isolated paced rat heart. *P. B. Taylor and F. J. Cerny*	328
2, 6	Exercise stress and enzyme-induced emphysema. *H. Sahebjami and C. L. Vassallo*	332
1, 2, 6	Role of the carotid bodies in the heart rate response to breath holding in man. *P. M. Gross, B. J. Whipp, J. T. Davidson, S. N. Koyal, and K. Wasserman*	336

SECTION		PAGE
2	Comparison of spontaneous and positive-pressure breathing in supine normal subjects. *L. J. Bynum, J. E. Wilson III, and A. K. Pierce*	341
1, 2, 6	Decompression-induced decrease in N_2-elimination rate in awake dogs. *B. G. D'Aoust, K. H. Smith, and H. T. Swanson*	348
1, 6	Depressed myocardial function in the goat at high altitude. *C. E. Tucker, W. E. James, M. A. Berry, C. J. Johnstone, and R. F. Grover*	356
1	Myocardial interaction between the ventricles. *W. P. Santamore, P. R. Lynch, G. Meier, J. Heckman, and A. A. Bove*	362
2, 11	Mechanics of the canine diaphragm. *M. J. Kim, W. S. Druz, J. Danon, W. Machnach, and J. T. Sharp*	369
1	Modulation of carotid baroreflex responsiveness in man: effects of posture and propranolol. *D. L. Eckberg, F. M. Abboud, and A. L. Mark*	383
2	Distribution of pulmonary resistance. *J. M. Drazen, S. H. Loring, and R. H. Ingram*	388
2	Localization of airway constriction using gases of varying density and viscosity. *J. M. Drazen, S. H. Loring, and R. H. Ingram*	396
2, 8	Determinants of regional distribution of a bolus inhaled from residual volume. *C. A. Hales, R. Gibbons, C. Burnham, and H. Kazemi*	400

SPECIAL COMMUNICATIONS

1, 2	Quantitation of right-to-left shunting by double indicator and oxygen techniques. *D. P. Copley, R. A. Klocke, and F. J. Klocke*	409
3, 5, 12	Storage telemetric system for detection of radionuclide tracers in humans. *J. Bojsen and S. Vadstrup*	416
1, 2, 12	Ventilation-perfusion ratio obtained by a noninvasive frequency response technique. *A. Zwart, R. C. Seagrave, and A. van Dieren*	419
4, 12	Novel telemetric system for extraluminal measurement of gastrointestinal motility. *N. L. Shearin, C. J. Pfeiffer, and S. Kilam*	425
2, 8, 12	Small inexpensive anesthetic apparatus for rats. *W. J. Cooke*	429
1, 8, 9	Mechanical apparatus for rigid suspension of the spinal column in mammals. *H. Eick, D. R. Kostreva, M. Hosko, and J. P. Kampine*	431

Subject Index to Volume 41

Adrenergic ground plexus, 30
Aerobic power
  and anaerobic threshold during exercise, 544
  and response to work in hot environments, 815
Aerobic work, physiological adjustments, 46
Aerohypoxia, 159
Aerosol adrenergic agent, effect on mucociliary clearance, 146
Age differences, effect on pulmonary mechanics, 20
Aging
  and variation of body fat estimation, 223
  physiological, of runners, 46
  variation in respiratory sinus arrhythmia, 734
Airway constriction, localization using gases, 396
Airway hysteresis, 581
Airway occlusion, respiratory response in infants, 634
Airway resistance, effect of gas flow rate, 234
Alanine, response during prolonged exercise, 683
Aldosterone
  levels during heat stress, 323
  plasma and urinary, in running exercise, 26
Alveolar hypoxia, and prostaglandin synthetase inhibitors, 714
Alveolar plateau, 185
Altitude acclimatization, thermoregulatory response to cold, 848
Amines, biogenic, effect on trachea and bronchus, 62
Anaerobic threshold, onset during incremental exercise, 544
Anal sphincter pressure, and viscoelastic properties of rectum, 677
Anesthesia
  and absence of compensatory augmentation of neural drive, 285
  methoxyflurane, and CO_2 rebreathing, 285
Anesthetic apparatus, 429
Angiography, 925
Angiotensin
  converting enzyme, 84
  infused, effect on hypoxic pulmonary vasoconstriction, 84
Angiotensin II
  in running exercise, 26
  levels during heat stress, 323
  radioimmunoassay, 462
Anoxia and brain metabolism, 480
Antipapain, 174
Antitrypsin, separation from antipapain, 174
Apical excluded volume, 400
Apnea of prematurity, 41
Apneic bradycardia, 336
Apneustic center, regulation of ventilation, 612
Arginine, influence on serum growth hormone, 523
Arteries
  coronary, autonomic innervation, 30
  longitudinal and helical ridges, 910
Ascaris suum antigen, and bronchial challenge, 668
Ascent criteria, and gas equilibration rates, 348
Ascorbic acid, effect on heat acclimatization, 202
Asthma, lung mechanics following antigen challenge, 668
Atheroma formation, 646
Atherosclerosis, 910
Athletes, physiological aging, 16
Atmospheric contamination, changes in pulmonary function, 859
Autonomic nervous system, and skin humidity, 256

Baroreflex
  and graded muscle ischemia, 693
  sensitivity, 36
Basal excluded volume, 400
Behavioral regulation, use of sweet stimuli, 77
Beta-adrenergic blockade, effect on ventilation, 886
Beta sympathetic blockade, 356
Blood, interval jugular, 93
Blood flow
  in branching vessels, 646
  interactions between local and reflex influences, 826
  umbilical, effect of hypercapnia, 727
  uterine, effect of hypercapnia, 727
  uteroplacental, during hyperthermia, 197
Blood gases, arterial, 462
Blood hydrodynamics, 910
Blood lactate, and exercise, 191
Blood pressure
  arterial, 323
  and graded muscle ischemia, 693
Body composition and body fat estimation, 223
Body fluid distribution, effect of lower body negative pressure, 719
Body temperature
  and cold-induced shivering, 142
  response to ascorbic acid, 202
Body weight distribution, effect on body fluids, 719
Bohr shift, correction for, 259
Brain metabolism, pyridine nucleotide fluorescence, 480
Brainstem respiratory activity, computer simulation, 931
Breath-holding, response of heart rate, 336
Breathing
  control, in premature infants, 41
  spontaneous, comparison with positive-pressure, 341
Bronchoconstriction
  aerosol penetration and clearance, 920
  vagal, 581
Bronchodilation, drug-induced, 62

Carbachol, effect on trachea and bronchus, 62
Carbohydrate metabolism, gluconeogenesis and heat acclimation, 871
Carbon monoxide
  acclimation to exposure, 689
  influence on hemoglobin-oxygen binding, 893
Cardiorespiratory deconditioning, 905
Cardiorespiratory endurance, 822
Cardiorespiratory responses, female, and training intensity, 822
Cardiovascular endurance, 822
Cardiovascular response, to graded muscle ischemia, 693
Carotid baroreflex, modulation of responsiveness, 383
Carotid bodies, role in heart rate response to breath-holding, 336
Carotid sinus, dimensions in coarctation, 36
Catecholamines
  and coagulation abnormalities in hypobaric hypoxia, 702
  demonstration of, 30
  urinary, excretion on acute induction to high altitude, 631
Cerebellar pressor response, 574
Cerebrospinal fluid
  P_{CO_2} gradients, 93
  pH gradients, 93
Cervical dilation, 316
Chemoreceptors
  cardiovascular, 336
  central, 41
  peripheral, effect of O_2 and CO_2 in preterm infants, 609
  peripheral, ventilatory control in hypoxemia, 878
Chest wall mechanics
  elastic cost of wall distortion, 752
  volume pressure relationships, 739
Cholinesterases, 30
Cilioexcitation, effect of aerosol adrenergic agents, 146
Circadian rhythms, internal body temperature, 15
Circulation
  changes in acute high-altitude exposure, 159
  coronary, high-altitude changes, 832
  peripheral, thermoregulatory changes, 15
  peripheral, interactions between local and reflex influences, 826
CO_2
  exchange in parabronchial lung, 302
  induction of cyclic hypoxic pulmonary vasoconstriction, 466
  rebreathing, changes in phrenic activity and occlusion pressure, 536
Coagulation, abnormalities during hypobaric hypoxia, 702
Coagulopathy, 702

Coarctation, baroreflex sensitivity in, 36
Cold accimation, physiological and behavioral reactions, 292
Collagen, effects of hyperbaric oxygen, 295
Comparative physiology, skin vasodilation, 528
Coronary occlusion, left ventricular effects on right ventricular developed pressure, 925

Decompression, decrease in nitrogen elimination rate, 348
Dehydration
  cold-induced, 497
  effect on sodium and potassium metabolism, 457
Denervation, of chemoreceptor, 336
Densitometry, measurement of body fat, 223
Diaphragm
  electrical activity, 536
  length-tension characteristics, 369
  radius of curvature, 369
Diving physiology, 120
  L-DOPA, levels of serum growth hormone, 523
2,3-DPG, erythrocytic, effect of carbon monoxide, 689

ECG, changes after high-altitude exposure, 159
Elastic load, and breathing studies, 277
Electrical pacing, heart rate and work load, 328
Electromyography, and thermoregulation, 142
Emphysema, enzyme-induced, 332
Endurance training, respiratory mechanics, 508
Evaporation coefficient and heat exposure, 71
Excretion, tubular, 457
Exercise
  changes in renin-angiotensin-aldosterone system, 26
  isometric, energetics of, 136
  stress and enzyme-induced emphysema, 332

Fastigial nucleus, cerebellar pressor response, 574
Flow rates, maximal expiratory, measurement, 153
Flow regimes, airways resistance, 234
Flow-volume curves, assessment of pulmonary mechanics, 20
Fluid acid-base, arterial and cerebrospinal, 878
Fluorescence microscopy, 764
Frostbite, experimental, 551

Glucagon, and prolonged exercise, 683
Gluconeogenesis, 683
  heat acclimation and carbohydrate metabolism, 871
Glucopenia, CNS, hypothermia modification, 559
Glucose ingestion, influences during exercise, 683
Glucose kinetics analysis, 565
Glycerol, and prolonged exercise, 683
Growth hormone, stimuli in exercise, 523

Haldane effect, 302
Heart rate
  and exercise, 191
  changes with heat stress, 323
  changes with exercise during bed rest, 905
  response to breath-holding, 336
Heat acclimatization
  effect of ascorbic acid, 202
  effect on intravascular responses to heat stress, 708
Heat stress
  and angiotensin II and aldosterone, 323
  and plasma renin activity, 323
  and thermoregulation, 57
  intravascular responses, 708
Hemodialysis, and respiratory alkalosis, 216
Hemodynamics, systolic time intervals, 52
Hemoglobin-oxygen affinity
  effects of sodium *o*-iodobenzoate, 900
  influence of carbon monoxide, 893
Histamine, effect on trachea and bronchus, 62
Homeostasis, and water immersion, 230
Hyperbaric oxygen, effects on collagen and elastin, 295
Hypercapnia
  acute and chronic, ventilation, 839
  adaptation to, 168
  and chemoreceptor stimuli, 612
  effect on uterine and umbilical circulation, 727
  threshold shivering temperatures, 67
Hypermetabolism, drug-induced, 639
Hyperoxia, and chemoreceptor stimuli, 612
Hyperpnea
  cardiodynamic, 886
  regulation in exercise, 89
Hypertension
  coarctation, 36
  pulmonary arterial, 449
Hyperthermia, uteroplacental blood flow changes, 197
Hyperventilation, muscle action, 739
Hypobaric chamber, changes in cerebrospinal fluid, 93
Hypocapnia, diminished vasoreactivity, 466
Hypoglycemia, and insulin, 523
Hypokalemia, 457
Hypopnea, cardiodynamic, 886
Hypothalamic set point, 77
Hypovolemic stress, and plasma angiotensin II, 462
Hypoxemia
  chronic, 356
  ventilatory control, 878
Hypoxia
  adaptation to, 168
  and CO exposure, 689
  and chemoreceptor stimuli, 612
  coronary circulation, 832

telemetric system for extraluminal measurement of gastrointestinal motility, 425
transducer for recording chronic intestinal activity, 942
venous ultrasound for evaluation of arterial hemodynamics, 946
Mucociliary clearance, 146
Mucociliary transport, 920
Muscle regulation, abdominal, 310
Muscular development, and body fat, 223
Myocardial function, high altitude, 356
Myocardial interaction, 925
ventricular, 362
Myocardial ischemia, 925
Myocardial O_2 supply, high-altitude, 832
Myogenic response, 865

N_2, rise after oxygen breathing, 517
Nerves, vagus, respiration regulation, 1
Neuron, average firing frequencies, 98
Nitrogen elimination rate, after decompression, 348
Nonadrenergic inhibitory nervous system, 764
Norepinephrine, demonstration of, 30

Obesity
and estimation of body fat, 223
indices, 77
Occlusion, unilateral pulmonary arterial, 449
Occlusion pressure, 41
Osmotic disequilibrium, consequence of dialysis, 216
Oxygen
affinity, adaptations with altitude, 168
consumption and isometric exercise, 136
consumption and carotid bodies, 180
debt and isometric exercise, 136
uptake, and exercise, 191
uptake, in cardiorespiratory deconditioning, 905

Papain
in enzyme-induced emphysema, 332
inhibition by serum, 174
inhibitory capacity, 174
Parabronchial lung, CO_2 exchange, 302
Parenchymal hysteresis, airways, 153
Perivascular cholinergic plexus, 30
pH, arterial, 462
Phenyl diguanide, J receptor stimulation, 1
Phrenic nerve activity, 536
Physiology of labor, 316
Pilocarpine, and reduced surface tension, 7
Plasma aldosterone
and acute heat stress, 708
in running exercise, 26
Plasma angiotensin II, in hypoxic and hypovolemic stress, 462
Plasma coagulation factors, 702
Plasma osmolarity, and acute heat stress, 708
Plasma protein, and acute heat stress, 708
Plasma cortisol, and acute heat stress, 708
Plasma renin
activity in heat stress, 323
in running exercise, 26
Platelet antiserum, and pulmonary vascular response, 211
Platelet function, and hypobaric hypoxia, 702
Plethysmography, 581, 659
Pneumotaxic center, ventilation regulation, 612
Po_2, measurements in carotid body, 180
Polypeptides, effect on trachea and bronchus, 62
Potassium, measurement in estimation of body fat, 223
Potassium metabolism, effect of de- and rehydration, 457
Pregnancy, hypercapnia and uterine and umbilical circulation, 727
Premature infants, respiratory responses to CO_2, 41
Pressure-volume curve
changes after pilocarpine administration, 7
used to assess pulmonary mechanics, 20
Pressure-volume relationship, diastolic, 362
Propranolol, effect on carotid baroreflex, 383
Prostaglandins
and hypoxic pulmonary vasoconstriction, 211
effect on trachea and bronchus, 62
synthetase inhibitors, and pulmonary vasoconstriction, 714
Proteins, connective tissue, turnover estimation, 295
Pulmonary circulation, pressure-flow-volume relationships, 449
Pulmonary edema, acute induction to high altitude, 631
Pulmonary emphysema, experimental, 174
Pulmonary mechanics
age and sex differences, 20, 129
alveolar N_2 plateau and posture, 474
alveolar plateau, 517
Ascaris suum antigen challenge, 668
closing capacity and posture, 474
compliance, 581
dynamic pleural pressure, 489
effect of gas and flow on resistance, 234
effect of inspired volume on closing volume, 623
effect of posture on single-breath oxygen test, 474
emptying pattern, 517
genetic influence on flow-volume curves, 874
gravitational pleural pressure gradient, 185
inspiratory thermal time constant, 659
interaction of concentration and ventilation, in ozone, 859
lung pressure-volume relationship, 623
partial expiratory flow-volume maneuvers, 153
pleural-pressure gradient, 489
relation between rate and depth of breathing, 277
respiratory control mechanism, 536
rib cage and abdominal V-P partitioning, 752
theoretical lung model, 623
vascular resistance, 466
washout curves measured with airway obstruction, 185
Pulmonary resistance
effects of gas density, viscosity, and flow rates, 388
localization of airway constriction, 396
Pulmonary vasoconstriction, hypoxic, 714
Pyridine nucleotide fluorescence, 480
Pyruvate, responses during exercise, 683

Reabsorption, tubular, 457
Rectum, viscoelastic properties, 677
Reflexes
baroreceptor, 111, 383, 574
fastigial, 574
Head's paradoxical, 502
Hering-Breuer, 1
knee jerk, 1
motor system, 1
neonatal respiratory, 502
respiratory, and vagal receptors, 310
somatic, produced by J receptors, 1
visceral, produced by J receptors, 1
viscerosomatic, 1
Rehydration, effect on sodium and potassium metabolism, 457
Renal hemodynamics, 230
Renal sodium handling, 230
Renin, activity and concentration, 26
Renin-angiotensin-aldosterone system, 26, 462
Resistive load, breathing studies, 277
Respiration
adaptations with altitude change, 168
changes in acute exposure to high altitude, 159
neonatal, 502
neonatal, response to airway occlusion, 634

regulation, 93
Respiratory activity, brainstem, computer simulation, 931
Respiratory alkalosis
and uteroplacental blood flow, 197
transient, following hemodialysis, 216
Respiratory muscle action, 739
and partitioning of inspiratory work, 752
Respiratory quotient, 302
Repiratory reflexes
breathing through inspiratory resistor, 285
neonatal sighing, 502
Respiratory regulation, 1
and chemoreceptor stimuli, 612
Respiratory responses
to carbon dioxide, 41
to graded muscle ischemia, 693
Running, steady-state oxygen consumption, 532

Serum
creatinine, 323
electrolytes, 26
protease inhibitor, 174
sodium, 323
total protein, 26, 323
Sex differences, and pulmonary mechanics, 20
Shivering, cold-induced, 142
Shivering threshold, in hypercapnia, 67
Sinus arrhythmia, age variations, 734
Skin
experimentally induced frostbite, 551
sweating in severe exercise, 772
Sleep, and levels of serum growth hormone, 523
Sodium *o*-iodobenzoate, and hemoglobin-oxygen affinity, 900
Sodium metabolism, dehydration and rehydration, 457
Sodium salicylate, ventilatory stimulation, 639
Splanchnic metabolism, 683
Sucrose, hedonic response, 77
Supersaturation, decompression studies, 348
Surface morphology, intimal, 910
Surfactant secretion, pilocarpine-produced, 7
Sweating threshold, nocturnal lowering, 15
Sympathoadrenal system, 631
Systolic time intervals, cardiovascular function, 52

Tantalum bronchography, 581
Thermogenesis, shivering and nonshivering, 848
Thermogenic drinking, 497
Thermoregulation, 15
active skin vasodilation, 528
and exercise in heat, 57
cold-induced shivering, 142
exercise in hot environments, 815
female response to heat, 815
hypothermia, drug modification, 559
response to cold, altitude variation, 848
skin wetting during severe exercise, 772
shivering, in hypercapnia, 67
Thirst, effect of water temperature, 497
Thoracic receptors, and ventilatory stimulation, 639
Thrombus formation, 646
Tissue elastic forces, effect of emphysema, 332
Trachea, presence on nonadrenergic inhibitory nervous system, 764
Tracheobronchial particle penetration, 920
Tracheobronchial tree, effect of aerosol adrenergic agents, 146

Uremia, and breathing control, 216
Urinary aldosterone, and running exercise, 26
Urinary catecholamine excretion, 631
Uterine activity, 316

Vagal tone, and pulmonary mechanics, 581
Vagus nerve, and pulmonary mechanics, 310
Vasoconstriction
cutaneous, 826
cyclic hypoxic pulmonary, 466
hypoxic pulmonary, 449
hypoxic pulmonary and prostaglandins, 714
reflex, 865
Vasodilation
cold-induced in frostbite, 551
cutaneous, 826
in skin, with heat stress, 528
threshold, nocturnal lowering, 15
Venous distension, acute, 865
Venous occlusion, 865
Ventilation-perfusion distribution, 341, 466
Ventilatory control
in hypercapnia, 839
role of thoracic receptors, 639
Ventilatory muscles, in endurance training, 508
Ventilatory response, effects of CO_2 and O_2 in preterm infants, 609
Viscoelasticity, rectal, and anal pressure, 677
Volume-pressure curves, and lung elasticity, 129

Wind chill frostbite, 551
Work overload, and isolated paced heart, 328
